

SL30 / SL32 Self-Contained Lanterns

This equipment complies with requirements of the U.S. Coast Guard in 33 CFR part 66

SL30- with single 2watt solar module

The Sealite Advantage

- 2watt solar module(s)
- 1.3Ah battery
- 4 day autonomy
- Interchangeable 20 LED flasher units

The SL30 and SL32 3-4 nautical mile LED lanterns perform exceptionally well in medium-high sunlight regions. The units are ideal for fixed and buoy installations including navigation, hazard lighting, perimeter lighting and a range of other applications.

The lanterns have gained wide acceptance with marine departments, and are extremely popular across Australia, and extensively used throughout the Middle East, Asia, South America and the Maldives.

The SL30 and SL32 lanterns remain the most affordable 3-4 nautical mile lights available.

The lanterns are covered by the Sealite 3-year warranty, and all components are replaceable, and can be purchased individually in the unlikely event of damage to the unit.

Operational Area •

• Operational region maps are a guide only.

SL32 installed on buoy, Docklands, Melbourne, Australia
